Dear Sir/Madam:

I would like to request information concerning an application for scientific research sponsored by the CTR.

After receiving and reading the 1988 Report which you graciously sent to me, I saw that our research on a basic mechanism regulating growth and differentiation of human cells, having both pharmacological and toxicological implications, could be consistent with the goals of your institute.

I have enclosed a couple of our recent papers which illustrate the new technologies we have to study this process, namely intercellular communication.

Thank you for your cooperation.

Most sincerely,

James E. Trosko

James E. Trosko, Ph.D.
